

K-LOVE serves me as a resident of the local community by providing encouraging and positive music to the Christian and Non-Chrsitian Community. Eliminating or downgrading their radio service will cause this important and needed part of our development as human beings to be neglected.

There are very few positive influences on our world today. Eliminating or downgrading the K-LOVE radio service will keep reducing these positive influences and probably more bad influences will come into our radio waves.

The service that K-LOVE provides is of public interest because they provide a good and positive service to the community by including programming that is of high moral standards and encouraging for our world today.
